

Requirements for Substitute Forms (10/27/06)

Guidelines for 2006 Tax Year Scannable Forms
IT-540 and IT-540B

General Information

The 2006 Louisiana Individual Income Tax IT-540 Resident and the IT-540B Nonresident returns are scannable forms processed on high speed scanners. Substitute computer generated returns of these two forms must incorporate a scannable band in a fixed format. Each return, including the scannable band, is to be formatted to fit onto a single-side of one page. Accompanying schedules are to be formatted to fit onto a single-side of a separate page. The exact positioning for each line item in the scannable band is listed in these specifications. Punctuation should NOT be printed in the scannable band. Signature of the taxpayer(s) on substitute or computer generated forms must be original.

Testing and Approval Requirements

One original laser copy of each test return, complete using sample variable data, should be printed and submitted to the Department for approval prior to usage. Original laser samples should be submitted for any form containing a scan-line (R-540V-SD, Electronic Filing Payment Voucher, IT-540ES, Estimated Tax Declaration Voucher for Individuals, and CIFT-620ES, Estimated Tax Declaration Voucher for Corporations). If the software does not support nonresident returns, fiscal year filers, electronic filing, or individual and corporation estimated tax vouchers, it is not necessary to submit those test samples. The Department will start accepting forms for testing and approval on **October 30**. All test documents must be submitted to the Department on or before **December 31**. Forms submitted for testing and approval outside of this time period must be approved with the Department prior to submission. Forms approval should be mailed to:

A "three of nine" type bar code shall be used on the Resident, Schedules, and Nonresident. The series of lines composing the bar code must be at least 1/4 inch in height. The bar code must be placed 1/2 inch from the bottom on Line 63 and 1/2 inch from the left edge of the page. The bar code on each form shall represent the document identification numbers plus a designated alpha character. The characters that the bar code represents should not be printed with the bar code.

(See the IT-540 and IT-540B sample with grid).

Name and Address Area - Resident and Nonresident Forms

The taxpayer's Social Security Number, spouse's Social Security Number, and telephone number must be printed on Line 15, positions 6-37. If the filing status is head of household, the name of the qualifying person must be printed on the line provided (under Line 5). The first names of the dependents must be printed on the lines provided for dependent's (under Line 6D). If the last name is different both the first and last name should be printed.

Resident & Nonresident Forms - Specific Positions Outside the Scannable Band

For the resident and nonresident returns, the mark-sense boxes for "Change of Name", "Change of Address", "Amended Return", and "Decedent" are areas outside of the scannable band that will be read by the scanner. These areas outside of the scannable band must be programmed in the specific manner and at the positions given below.

Rectangular drawn mark-sense boxes are NOT to be used to mark these positions. The "Change of Name", "Change of Address", "Amended Return" and "Decedent" positions must be marked by use of an upper case letter "O" (not the numeral zero) in 12 pt. Courier. The "O" must be hard-coded into the form template and must be programmed so that it can be marked with "X" (uppercase) in order to denote changes. For the "Change of Name", "Change of Address", "Amended Return" and "Decedent" positions the program should print a "zero" in the scannable band for a negative response and a numeral "one" for a positive response.

The specific position for the change of name "O" is Line 11, position 7.

The specific position for the change of address "O" is Line 12, position 7.

The specific position for the amended return "O" is Line 13, position 7.

The specific position for the decedent return "O" is Line 14, position 7.

The Schedule Page

IF THE TAXPAYER DOES NOT UTILIZE ANY OF THE SCHEDULES, THE SCHEDULE PAGE SHOULD NOT BE SUBMITTED TO THE DEPARTMENT FOR PROCESSING UNLESS THE SCHEDULE PAGE IS USED FOR PROVIDING SUPPLEMENTAL INFORMATION.

Software Developer Identification Number

Each software developer who hard-codes the basic form template and/or soft-codes the program of the scannable band area of the resident and/or nonresident form, must have a four-digit software developer's identification number, approved by the Louisiana Department of Revenue. This number remains the same each year. As determined below, this number **MUST** appear at the top left of the form and/or in the scannable band of the form.

1. For those who hard-code the resident or non-resident basic form template, the software developer identification number should be on Line 9, positions 6 - 9. On the schedule form the software identification number should be hard-coded on Line 6.
2. For those who soft-code the program of the scannable band of the resident and nonresident form, the number should be soft-coded, right-justified, zero-fill, in Column Two, Line 31, positions 15-24.

IT-540 - Resident Form

How must the scannable band appear on the Resident Form?

The read area within the scannable band will be composed of one horizontal line and eight vertical columns of varying widths. Four columns will contain printed text (columns 1, 3, 5, and 7), and four columns will contain variable information (columns 2, 4, 6, and 8).

- Both alpha and numeric entries will be made in the scannable band;
- Courier font 12 pt., 10 characters per inch;
- The horizontal line area will occupy Line 26, positions 7-26, 30-38, 42-51, 55, 57, 59-63, 65, 68, 70, 72, 75 and 78.
- First vertical column will occupy Lines 29-53, positions 7-11;
- Second vertical column will occupy Lines 29-53, positions 15-24;

Right justify all data in each column, including dollar amounts, numeric entries, etc.; "0" fill all blank data areas, except areas used for the name and address codes (four positions each) in horizontal line area. The name and address codes should begin at the left most position allotted for these items and any position not used should be left BLANK. Punctuation and hyphens should be omitted and no position allotted for them. EXAMPLES: John Doe, 1234 Main Street = DOE_1234; John Deer, 123 Main Street = DEER123_.

Print "0" to designate a negative response; Print "1" to designate a positive response;
When designating a response for the Filing Status field, the LINE NUMBER of the appropriate filing status should appear in the field. Example: For Single, use "1"; for Married filing jointly, use "2", etc.;
All monetary entries must be positive, in dollars only, and with NO decimal points, commas, punctuation, or other symbols.
